[UMP researchers develop SCAV self-driving bus for campus residents](#)

28 December 2021

With various expertise in the engineering and technology field, researchers from Université de Moncton are currently developing a smart bus with a computer system to move on its own without a driver.

The Smart Campus Autonomous Vehicle (SCAV) is equipped with various sensors and software to move from one destination to another by itself through the control of a computer system equipped with artificial intelligence.
