### Nanotechnology treats cancer focus of UMP researchers

8 December 2020

KUANTAN, 30 November 2020 - The triple-negative breast cancer (TNBC) research project using nanotechnology has been the focus of researchers from Universiti Malaysia Pahang (UMP).

The project leader and lecturer from the Faculty of Chemical and Process Engineering Technology, Veloo Kutty, 34, said TNBC is a very aggressive and dangerous type of breast cancer.

“There is 15 to 20 per cent of TNBC cases of all types of breast cancer.
